

PPP and Infrastructure Evaluation and Rating System (PIERS)

An Evaluation Methodology for the SDGs

Overall results

The Kingdom Of Bosarwa National Government, Kingdom of Bosarwa Union, Kingdom of Bosarwa National Defence Force, Basarwa Regime Alliance & Greenpeace Kingdom of Bosarwa.
South Africa

Outcomes	Score	Performance
Access and Equity	100%	Excellent
Economic Effectiveness and Fiscal Sustainability	100%	Excellent
Environmental Sustainability and Resilience	100%	Excellent
Replicability	100%	Excellent
Stakeholder Engagement	100%	Excellent
Overall score*	100%	Excellent

**The overall score is the weighted average of the score of each PPP for the SDGs outcome, adjusted based on the answers to the initial questions.*

Note: UNECE is not responsible for the use of the score given by this tool. The score is only an information of a project compliance with the PPP for the SDGs outcomes and is based on the answers given by the user.

Strengths

1. The project has taken into account the real needs of the people by reference to their economic and social situation.
2. The project has quantified the number of people who will have new or improved access to one or more essential services as a direct and/or indirect result of the project who previously had no or unsatisfactory access to these services.
3. For a concessions PPP: the service provided by the project is and can be expected to remain reasonably affordable for the users including if necessary, through special rules for those most vulnerable and disadvantaged.
For a government-pay PPP: the costs of the service provided by the project can be accommodated within the available public sector budget.
4. The level of service provided by the project has identified and addressed the accessibility needs of the people the project intends to serve over the life cycle of the project and taking into account various economic development scenarios, such that the service provided by the project is accessible by all users, including those most vulnerable and disadvantaged.

5. The project has conducted an Environmental and Social Impact Assessment and assessed and mitigated the project's range of potential direct and indirect social impacts (e.g., direct impacts on cultural, historical, recreational, or other resources and services resulting from the project and associated activities; impacts from independent secondary development or actions that may occur as a result of the project; indirect impacts on cultural, historic, recreational or other resource or services that are important to the local community) the project will have on the citizens and more particularly the host communities and affected people (i.e., the project service area).
6. The physical and economic displacement process as a result of the project has followed the UN Basic Principles and Guidelines on Development-based Evictions and Displacement.
7. The project has generally followed or adhered to the UNECE Standard on a Zero Tolerance Approach to Corruption in PPP Procurement (ZTC) or the principles contained therein.
8. The project delivers "value-for-people" meaning the project offers net tangible and intangible benefits to society by providing services to a consistently and verifiably higher standard over the life of the project.
9. The project generates positive "value-for-money" meaning the costs net of benefits of the selected PPP contractual model are lower vs. a modern public procurement model.
10. The fiscal sustainability of the PPP contract and the creditworthiness of the public authority were positively assessed and the transparently reflecting in public accounts.
11. The project is maximising development impact and facilitating women's empowerment throughout the stages of the PPP (identification, development, and implementation).
12. The project's private sponsor/shareholder is of adequate technical, financial and reputational standing to successfully finance, implement, operate and maintain the project over its life, including having access to necessary resources to fulfil its contractual obligations under various economic scenarios and to adapt the services provided to the potentially evolving needs.
13. The project has created a significant number of new local jobs during project identification, development, and implementation.
14. The project is creating quality jobs that are in line with the ILO Decent Work Indicators.
15. The project has developed a plan/identified strategies to reduce or offset greenhouse gas emissions over the life of the project.
16. The project is developing a plan/identifying strategies to improve the energy efficiency/reduce energy consumption of the project.
17. The project has investigated the potential to utilise unwanted waste and/or excess resources from another local project or by finding local destinations for the beneficial use/reuse of its unwanted waste and/or excess resources.
18. The project has conducted an environmental and social impact assessment (ESIA) (or initial environmental assessment (IEE) for category B projects).
19. The project is developing and implementing an environmental management plan (EMP) to avoid, mitigate impacts to, or restore the impact area.
20. The project has developed a well-articulated risk reduction and mitigation strategy for the project involving a response and recovery coordination mechanism being put in place with the host and the affected communities.
21. Opportunities for the transfer of knowledge/ know-how, technologies, and skills from the private party to the public party and/or local community stakeholders have been assessed and/or successfully implemented.
22. The project is increasing government capacity and/or project/industry capacity.
23. The project is implementing one or more innovative methods, technologies, or processes that eliminate or substantially reduce significant problems, barriers or limitations, and/or create scalable and transferrable solutions.

24. The project is including a transfer of technology (e.g. to enable a circular economy) or know-how that contributes to inclusive growth, service quality, sustainability and replicability.
25. The project has undertaken a stakeholder mapping exercise to determine all stakeholders that are directly and indirectly affected by and/or interested in the project.
26. A stakeholder engagement and public participation plan has been developed for the project that takes into account the specific needs of each stakeholder and considers the broad range of project issues, as related to the PPP for the SDGs outcomes, that need to be addressed.
27. The project has implemented the stakeholder engagement and public participation plan(s) throughout the project's lifecycle in an effective, timely, and inclusive fashion.
28. The project has implemented all measures possible to ensure members of the public, including environmental defenders, are able to express their views and participate freely without fear of being penalised, persecuted or harassed for their involvement.
29. Quality and pertinent information about the project relative to the PPP for the SDGs outcomes is readily available to all stakeholders, including members of the public, and provided in a transparent, timely, understandable, and accessible fashion and is incorporated in the PPP contract.
