Submission to the Parliament of South Africa

Topic: Formal Request for the Permanent Withdrawal and Termination of ISO/IEC Standards to Mitigate Corruption and Foreign Disaster Risk within South African Jurisdictions and Traditional Authorities.

Submitted By: The Kgotla Consensus Authority Diplomatic Structures & Traditional Sovereign Foundations (Tswana, Sotho, Pedi, and Sarwa Royal Constitutions)

Led By: Paramount Chief Oupa Molefe

1. Executive Summary & Core Mandate

This submission formally requests the **permanent withdrawal, termination, and non-application of ISO/IEC international standards** across all South African and African state organs, public entities, and traditional governance jurisdictions.

The Kgotla Consensus Authority submits that the standardisation of digital and data architectures via foreign, commercialised mechanisms (such as ISO/IEC frameworks) introduces severe vulnerabilities that compromise domestic data integrity, enable structural corruption, and escalate foreign disaster risks using State's Assets Votes via Political Organizations as empty promises advantage. This submission outlines the legislative, administrative, and sovereign grounds for finalizing the transition to native administrative architectures, anchored by verified findings from Special Investigating Unit (SIU) investigations, Independent Police Investigative Directorate, South Africa Police Service, South African Defence Force, Hawks, Commissions, Africa, United Nations, United States of America, Asian Authorities etc

2. The Legal and Sovereign Grounds for Withdrawal

- **The Kgotla Consensus Authority Framework:** Traditional administrative diplomatic structures, operating under the ancestral consensus of Tswana, Sotho, Pedi, and Sarwa Royal Constitutions, maintain an independent legal and traditional status. Foreign technical frameworks cannot supersede indigenous governance or Kingdom Of Bosarwa customary administrative oversight.

- **Corruption Mitigation, SIU Investigation & Global Authorities Findings:** Evidence from multiple Special Investigating Unit (SIU) investigations & Global Authorities has demonstrated that complex, opaque, and foreign-sourced IT procurement frameworks are frequently leveraged to bypass localized transparency standards. Withdrawing reliance on ISO/IEC technical baselines strips away the artificial technical compliance layers often used to cover up procurement irregularities.

- **Foreign Disaster Risk Reduction:** Reliance on transnational technical standards exposes local infrastructure to localized or international systematic collapses, remote digital assertions, and extrajudicial data vulnerability. De-linking from these frameworks ensures a localized, resilient containment strategy.

3. Administrative Directives & Requested Resolutions

The Parliament of South Africa is requested to direct all state authorities to execute the following steps:

- **De-registration and Withdrawal:** Formally initiate standard-withdrawal protocols for ISO/IEC structural frameworks currently embedded within national data, cybersecurity, and administrative regulations.

- **Finalization of Localized Traditional Architectures:** Transition all state-to-traditional data channels and administrative interfaces to the finalized *Kgotla Consensus Authority* diplomatic structures, ensuring strict compliance with indigenous transparency and localized accountability measures.

- **Exclusion from Fiscal & Revenue Standard Restraints:** Ensure that upcoming fiscal frameworks, revenue protocols, and supply-chain criteria do not mandate or prefer foreign commercialized standardizations over verified local sovereign systems.

4. Conclusions & Recommendations

- **Parliament is requested to:**
  1. Note the uploaded and registered traditional constitutions of the Tswana, Sotho, Pedi, and Sarwa Royals as foundational documents for land and fiscal planning. Integrate the iCSO Status ID: #558483 parameters into the national digital infrastructure tracking systems. Establish a formal consultative channel between the parliamentary committees, the Department of Health ADaM platform, and the Kgotla Consensus Authority to finalize the diplomatic and land reform transformation roadmap.

Signed,
Paramount Chief Oupa Molefe
Kingdom of Bosarwa Union Sovereign Traditional Authority.
